EUROMEDEX

dNTP Set (100mM each)

Cat. No.	Pack Size
EUH40204	4 x 1 ml

Storage & Shipping:

Store at -20°C. Guaranteed stable for 1 year if properly stored.
Shipping and temporary storage for up to 1 month at room temperature has no detrimental effects on the quality of this reagent.

Description:

- Separate vials of four dNTPs
- Concentrated neutralized solutions

dNTP Set contains four separate vials (4×0.4 ml) of dATP, dCTP, dGTP and dTTP, at a concentration of 100 mM each, in highly purified (>99%) deionized water at pH 7.5.
dNTP Set is free of RNase and DNase, and suitable for any molecular biology application that requires pure deoxynucleotides, such as PCR, real-time PCR, DNA sequencing, cDNA synthesis and nick translation.
dNTP Set has been tested for PCR.

Safety warnings and precautions:

This product is designed for research purposes and *in vitro* use only.
According to common laboratory safety practice, it is recommended to wear protective clothing, gloves and safety glasses.
Some applications this product is used in may require a license which is not provided by the purchase of this product. Users should obtain the license if required.
